Eric Junqueira

Full Stack Software Engineer

Fortaleza, Brazil | [LinkedIn](#) | [Github](#) | ericiannj@gmail.com

SUMMARY

Full Stack Software Engineer with 5 years of experience using JavaScript, TypeScript, React, Next.js, Node.js, Express.js, and NestJS. I build scalable, high-quality web apps, reusable components, and APIs, with a strong focus on testing and maintainability. I thrive in agile, cross-functional teams, delivering impactful, well-documented features that improve UX and support large-scale products. I build solutions that drive both product growth and team efficiency.

WORK EXPERIENCE

Beakyn   **US, Remote**
Full Stack Developer   *August 2022 - Present*
- Developed UI features and worked on API modules to enhance user interactions with data analysis based on location, contributing to a product that generates media impact on about 70% of Americans weekly.
- Created and documented over 60 reusable UI components and over 30 API resolvers with high quality, adhering to design system standards, and collaborated with backend services to craft full-stack solutions.
- Implemented 50+ front-end test suites, covering use-cases, component, UI, and behavior testing, ensuring code quality and reliability in continuous integration pipelines.

Big Brain   **Brazil, Remote**
Full Stack Developer (Front-end Focus)   *October 2021 – July 2022*
- Introduced the UI of the first functional version of an educational customer portal, integrating access to 8+ of the company's established educational services.
- Built over 30 visual components for reuse across products, boosting UI design uniformity by over 15% and accelerating feature rollout of applications.
- Partnered with design, product management, and engineering teams to deliver front-end features, while advocating for code quality through peer reviews in products serving over 5000 users.

Grupo Portfolio   **Brazil, Remote**
Full Stack Developer (Front-end Focus)   *April 2021 – October 2021*
- Built the initial front-end version of a social network, serving over 300 users initially and later adopted by more than 5 major clients, each with hundreds of user employees.
- Led the design discussions, coding, and testing of 10+ core features, including authentication, posting, and commenting, with a focus on ensuring UI consistency and accessibility.
- Designed state management strategies that reduced memory usage by 10%, enabling the application to scale smoothly for future features.

Container Digital Jr   **Brazil, Remote**
Full Stack Developer (Front-end Focus)   *October 2020 – April 2021*
- Coded and maintained high-quality, accessible user interfaces for over 20 service providers, aiming to optimize client conversions through effective landing pages.
- Collaborated with customers and stakeholders to translate business needs, leading squads of 5 members across design, front-end, and back-end development to implement full-stack solutions in a team of over 25 contributors.
- Elevated code quality by ensuring peer review practices, achieving an average NPS above 90 in delivered products, as reported by Brasil Junior organization in 2020 and 2021.

SKILLS & LANGUAGES

Languages: English (Fluent) | Portuguese (Fluent) | German (Basic)

Skills: Core Technologies (JavaScript | TypeScript | HTML | CSS), Libraries & Framework (ReactJS | Next.js | Node.js | NestJS | Express.js) Styling & Design (Tailwind CSS | Styled Components | SCSS | Figma), Testing & State Management (React Testing Library | Jest | Redux | Context API), Integration (REST API | GraphQL | React Query) Methodologies & Deployment (Agile | Scrum | Kanban | CI/CD | AWS | GitHub Actions).

EDUCATION

Universidade Federal do Ceará   **Brazil**
Systems and Digital Media Bachelor's Degree
